**“Unbox and Start Making™” –  
effortlessly with your new  
makerspace and STEAM education  
partner, Maker Maven!**

Maker Maven is here to help you start or add to your makerspace easily and affordably. We've partnered with the very best companies in STEAM education to provide you with a variety of lower to higher tech maker activities suited for learners of all ages. Our STEAM based activities encourage creativity, collaboration, communication, and critical thinking, which are needed for 21st Century Learning. Our curriculum-friendly task cards provide essential skills needed for the 21st Century for both learners and facilitators.

Already have your perfect space in mind? Customize your space with any of our activities! Don't know where to start and need a little help? Select one of our makerspace kits that are designed as an easy way to start making! Either way, Maker Maven is your full service makerspace company for products and services.

## KITS:

Maker Maven makerspace kits are designed for students to "Unbox & Start Making™" and encourage basic STREAM (Science, Technology, Reading, Arts, and Math) concepts through hands-on makerspace activities. Each kit contains various makerspace activities that come complete with activity instructions, materials, and task cards that incorporate project based/inquiry based focus question(s) and extension activities.

## ACTIVITIES:

Want to customize your makerspace? Maker Maven activities and task cards are available to purchase individually! Contact your direct Maker Maven rep for a quote.

## TASK CARDS:

Maker Maven curriculum friendly task cards are designed to help both the educator and student "Unbox & Start Making™!" Task cards feature instructions on the back, and project based learning focus questions and extension activities on the front. Task cards are available for each activity in English and in Spanish.

## PD & WORKSHOPS:

Join Maker Maven for a day of making! Learn all about makerspaces or how to implement your new Maker Maven activities.
